

# High-Performance Fertilizer

## Fertilizer Efficiency Tools from Helena Can Help Your Fertilizer Work Harder

Getting more from your fertilizer can result in healthier crops—and a healthier harvest!

Helena's unique fertilizer efficiency tools can help your fertilizer work harder. They work in tandem with your existing fertility program to help extend crop nutrition so that you get extra value from your fertilizer.

Your goal is higher, more profitable yields. With Hydra-Hume, TraFix Zn or NutrAsyst, you can get more from your fertilizer so that your crops give you more at harvest.

### Hydra-Hume

- Enhances efficiency of N-P-K & certain micronutrients
- Helps prevent nutrient tie-up
- Improves soil & plant moisture retention
- Liquid or dry granules

### TraFix Zn

- Extended Zinc uptake
- Contains Sulfur & growth-promoting agents
- High-quality formulation
- Easy to mix
- Longstanding superior performance

### NutrAsyst

- Improves efficiency of liquid starter fertilizers
- Solubilizes many soil nutrients
- Enhances tank-mix compatibility
